

GuideXP TechLauncher Client Meeting Minutes

Meeting No. 3
6pm, 1 Moore St Civic
March 14, 2019

Meeting Chaired by Client, Open at 6:05PM

Attendees:

Jayden Castillo	Client
Liang Hong	u6303287
Rutai Sun	u6227336
Danny Feng	u6611178
Yuanze Niu	u6401780
Yu Qiu	u6063921
Kelin Zhu	u5746348

Discussions

Firstly, our client asks about our Project Audit 1, we give a general describe of our Audit presentation. The presentation part is quite well, however our audit page is lacking introduction and content. Therefore, to provide better view, we told our client that we decide to use github instead of google drive in order how more content on our audit page. We also told our client that we will be using gitlab for code programming and MongoDB to help us develop our database.

Our client then described his expectations of the exhibits interface, that is linked with two tables. One exhibition table which includes all the exhibitions, and one information table which shows the exhibition information that includes IP, title, image, sound and social media. All this information will also be shown on the server which will transfer data with API and the database.

Afterwards, our client described his expectation of one exhibition interface by showing us an example on his laptop. We then know the basis frame structure of these interfaces, and the current task that we will need to complete. Our client also said that they will provide relevant data for us, which will help us to test storing data in our database.

After the meeting, we have a quick discussion about the task that each role need to do, currently we will start with the front-end and database. The roles of our team might change according to real situation.
