<div align="center">**Statement of Work (draft)**</div>

Project name: GuideXP

Start date: 25/02/19   **End date**: 31/05/19

Scope of work:
-   Design and implement an interactive web-based application, which allows artists to upload their contents and visitors to access artists' contents.

Deliverables:
a) User interface includes the following basic functionalities
    -   Navigation
    -   Display contents
    -   Create account , log in
    -   Adapt to different screen size on pc and mobile devices
b) Databases that store users' contents
    -   Contents include audio, image
    -   User information , username, password
c) Connect front-end and back-end

Schedule:
Week 2-3: Discovery of requirements.
Week 4-5: Build the database.
Week 6-9: Design the website structure , logical function, implement the User Interface(UI).
Week 10-11: Implement the Application Program Interface (API).
Week 12: Test, debug and gather feedback from clients.

Milestones:
Phase 1: Discovery report.
Phase 2: Database construction.
Phase 3: Design the User Interface and logical function of the website.
Phase 4: Implement the User Interface (UI).
Phase 5: Establish an Application Program Interface (API) which links UI and database.
Phase 6: Test GuideXP website.

Expected outcomes:
The GuideXP web should be capable of:
1. Providing a useable user interface;
2. Being able to store new message to the database;
3. Response to the user's operation and provide guide experience to users.

Location of work and resources, equipment, and facilities needed:
1. Australian National University
2. Moore St Health Building,1 Moore St, Canberra
